

RAISING A TWEEN?

STAY IN THE KNOW ABOUT HPV AND ITS LINK TO CERTAIN

HPV-RELATED CANCERS

5 FACTS FOR PARENTS TO STAY INFORMED:

- 1 HPV IS A COMMON VIRUS.**
HPV, or human papillomavirus, often has no signs or symptoms. People can have the virus, pass it along, and not even know it.
- 2 FOR MOST PEOPLE, HPV CLEARS ON ITS OWN.**
But for others who don't clear the virus, it can cause certain cancers later in life.
- 3 HPV CAN AFFECT BOTH MALES AND FEMALES.**
You probably know HPV can affect females, but males may also be at risk for certain HPV-related cancers later in life.
- 4 TENS OF THOUSANDS OF PEOPLE WERE DIAGNOSED WITH CERTAIN HPV-RELATED CANCERS***
each year from 2014-2018 in the United States.
*Based on 2014-2018 CDC data of certain HPV-related cancers diagnosed each year in the US.
- 5 HPV VACCINATION IS A TYPE OF CANCER PREVENTION.**
It can help protect your child from certain HPV-related cancers later in life.

**Embrace this phase.
Help protect them in the next.**

Starting at age 9, talk to your child's doctor about certain HPV-related cancers.
