

WHAT IS WALK ON CLINIC?

- Walk On Clinic is an Onsite Direct Primary Care company connecting patients with providers they know, both in person and virtually.

WHAT MAKES WALK ON CLINIC DIFFERENT?

1. Walk On often has double the utilization of other near site DPC by being onsite instead of miles away.
2. Walk On provides transparent hard dollar ROI reporting by tracking all CPT codes as \$0 ghost claims.
3. Walk On has a far lower barrier to entry to put a clinic onsite, as the employer does not have to fund a brick-and-mortar clinic buildout, all while the patients stay connected virtually to the same medical team.
4. Walk On customizes the frequency of in person onsite care to fit employers of all sizes and locations.
5. Walk On leverages mobile health clinics that can be shared across multiple self funded employers.

WHO IS WALK ON CLINIC FOR?

- Self funded employers that already have an onsite clinic or DPC relationships but don't have the utilization, ROI reporting, or plan design integration they are looking for.
- Self funded employers that see the value in nurse navigation, but understand that an onsite provider with a relationship can create an even better experience for the patient.
- Self Funded Employers with multiple locations that would love an onsite clinic where one DPC office won't work.
- Employer groups that want to provide their employees with greater benefits.
